VALUES STATEMENT

Customer-centered operations professional with ten years supporting patrons and facility needs at M-NCPPC. Brings a responsible approach to service, practical technical curiosity, and a strong interest in efficient building systems and practical sustainability.

SERVICE COMMUNICATION

- Supported community-center patrons in person and by phone for ten years, including program registration and day-to-day service requests.
- Assisted credit-union members with account questions in a setting where accurate, clear communication was essential.

OPERATIONS COORDINATION AND PRIORITIZATION

- Helped manage weekend facility operations while balancing customer needs, event setup, program support, and weekly maintenance.
- Prepared spaces for events and performances, coordinated immediate needs with coworkers, and kept follow-up tasks visible through completion.

TECHNICAL TROUBLESHOOTING AND ANALYSIS

- Troubleshoot fitness equipment and provided sound support for performances, combining hands-on problem solving with customer service.
- Designed a residential solar-panel system and permit package; used Python and MATLAB in technical coursework and analysis projects.
